Subject: Surety for Spanish Valley Clay Mine

Dear Beth

Per our phone conversation today regarding the Spanish Valley Clay Mine site held by Grand County Water Conservancy District, I am requesting an extension of time as per Daron Haddock's 11-17-06 letter. I am not entirely sure that we should provide hard surety (or if we can) until your pending issues with other government entities are resolved. At that time we will move forward on this issue in whatever way is required.

Please keep us in the loop. I appreciate your efforts on our behalf.

Sincerely,

Marsha Modine
Grand Water & Sewer Service Agency
Bookkeeper

I don't have a problem giving these folks an extension of time to get the reclamation surety in place, but I think they need to be working toward that end. Paul, have we ever given them a reclamation cost estimate? Would you get with them and establish some kind of schedule to get this site bonded. Uintah County was able to do a self bond and I would think that Grand County would be able to do this as well.

requesting extension for surety because this is a government agency
